First Science At-Home April 13

Families are encouraged to discuss, draw, and write about our natural world. Review learning in Cycles in Space, Light and Sound Waves, and begin building excitement for Life Science.

Doug answers questions from kids around the country. Mystery Doug's Mini-Lessons click HERE

Review Mystery of the week:

Could a statue's shadow move?

Parents can sign up for more, free Mini-Lessons from Mystery Science click HERE

Keep a daily, weekly**, monthly weather log and** graph your observations

Parent Supported

Animal Observations – Create your own or get started here in observing animals in your area.

Science Investigation: Are you right or left brained?

National Geographic Family – Families can read and watch about science information and discuss what your family might think, do,

Design Squad – step by step support for leading kids in engineering projects

Design a New Sport Challenge – Work to create a new sport by following the Scientific Design process

Native American Stories told by Roger Fernandes:
Click on "Native American Story Connections" and scroll down to "Stories." Mr. Fernandes has been given permission by the tribes to tell these stories. As you listen, consider how a scientist might connect the stories to our natural world.

Personalized Digital Learning (2-3 times a week)
