

Summative activity for MS-ESS3-5: Reflect on learning about how humans impact the Earth.

Watch a couple of the videos from the Jet Propulsion Laboratory at Cal Tech. [Click here to find them.](#)

Think about these videos and consider the big question of “How to humans impact the environment?” by answering the following questions:

1. What data does NASA use as evidence in these videos?
2. List the scientific thinking that they share in each video.
 - Mission to Earth
 - Usual Suspects
 - Earth Has a Fever
 - Gas Problem
 - Scale in the Sky
 - Blowin’ in the Wind
 - Dishing the Dirt
 - Sea Level Rise
 - Greenland Ice
3. How can humans use what NASA knows to impact the Earth?
